

A Powerful Homemade Recipe That Makes All The Mosquitoes and Cockroaches Fall Dead Immediately

Our ecosystem is very rich in all kinds of species. Some of these species live far from the society and our environment, but, there are some that are in constant contact with us and that can be pretty annoying. Mosquitoes and cockroaches are the best example. These organisms are everywhere and are not only annoying, but they can also be a risk for our health as they carry an infinite number of diseases because of they come into contact with the human blood and other debris from the streets or places with poor hygiene.

On the topic of hygiene, we need to mention the fact that mosquitoes and flies in general are on sites where they can get food and put their offspring, usually in dirty places or places with standing water. The real problem actually is getting rid of these. Luckily, there is this natural remedy that will help you eliminate the mosquitoes and flies in an efficient way. Numerous products on the market claim to be helpful in eliminating them, but the chemicals they contain have certain side effects that should be avoided in our life, meaning that this natural remedy is the best choice for you.

Here is what you need for the preparation of this remedy:

- Half a cup of shampoo
- Half a cup of natural vinegar (with 9 percent concentration)
- Half a cup of vegetable oil

Preparation process:

Combine all ingredients and make sure that they are very well mixed into a homogenous mixture. Then, pour the mixture in a spray bottle so that you can spray it onto all the areas where you want these hateful and pesky mosquitoes or flies to disappear. This remedy can be used in any room as it is safe thanks to the all-natural ingredients it is made of. Moreover, you can use it in the garden or even apply it onto your skin and make it work as a natural repellent.
