

Charging the Body Electric Battery – for increase in Sport + School Performance

Lara White for Medical Expose

A team of European and American scientists have found a way to make you and your children a bit stronger, faster, smarter and more coordinated. This has been proven, validated and even registered for legal sale. Yes, the dream of human strength and performance enhancement. And this technology is available to you. Just ask Novak Djokovic. *See video+ articles in the references.*

The Body operates Electrically. All body processes have electrical components. The muscles operate magnetically. Inside the muscles tiny magnets draw the muscle cells over top of each other.

If the Body Electric is maximized then we can increase muscle action. In other words we can become stronger. Professor Desire' Dubounet has found a way to make a person stronger, faster and smarter with the **Eductor** technology. A sophisticated process to calibrate to the body electric and trickle in electrons has been developed to stabilize and maximize the body electric. And low and behold sport and intellect performance is enhanced. Just like when your battery in your phone runs down.

Muscles are the "magnetic engine" that your body uses to propel itself. Although they work differently than a car engine or an electric motor, muscles do the same thing -- they **turn electro-magnetic-static energy into motion**. A process was developed over 30 years of research to maximize the body electric.

There is much double blind evidence at the SCIO device can increase the VARHOPE electrical parameters of the body over a short 45 min session. (VARHOPE is an acronym for Voltage-Amperage-Resistance-Hydration-Oxidation- Ph- Eh). For more complete description of the studies and science see the ref. VARHOPE medical textbook. There is massive recognized research over 30 yrs in the references.

There is also much evidence of increased sport performance from SCIO treatment over twenty years of clinical sport use. This study theorizes that the VARHOPE increase results in increased muscle performance. In many studies a grip strength measure was inaccurate and not of much use for this study. Other studies show a better more refined measure of strength using free weight repetition.

Sport is a matter of inches. When it comes to getting a job, jumping a bit farther and higher, running a bit faster, a tiny bit more accuracy of eye-hand or eye-foot coordination can make a BIG difference in a future pay check. There is massive evidence that this **Eductor** technology increases performance.

We all have the experience of having our phone battery run down and we need to recharge it. We see the battery index bar dropping and we need to find a charger. Well our body maintains a charge, and our body's charge can run down. Well the **Eductor** technology can restore the charge back to its maximum. And 30 years of double blind peer reviewed journal evidenced validates this process.

Before

-Weak Charge-

After

-Topping up the Charge-

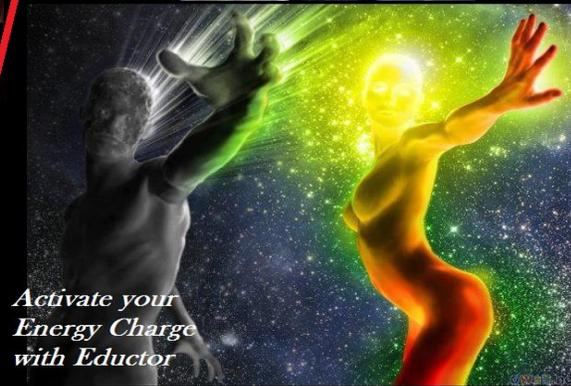

Research Studies show a 5 to 25% increase in school, work and sport performance.

We all know what it is like to have our phone battery run down. Our Body Electric can run down as well. The Educator can then restore our Body Battery to Full Charge.

Has Your Body Electric Energy Left ???

Has your Get Up + Go Got Up and Left ???

The Educator Tech can make your children a Bit Smarter, Stronger, Faster, More Coordinated with More Insight.

Is Your Battery on LOW !!

VARHOPE

VOLTAGE | AMPERAGE | RESISTANCE | HYDRATION | OXYGENATION
PH - PROTON PRESSURE | Eh - ELECTRON PRESSURE

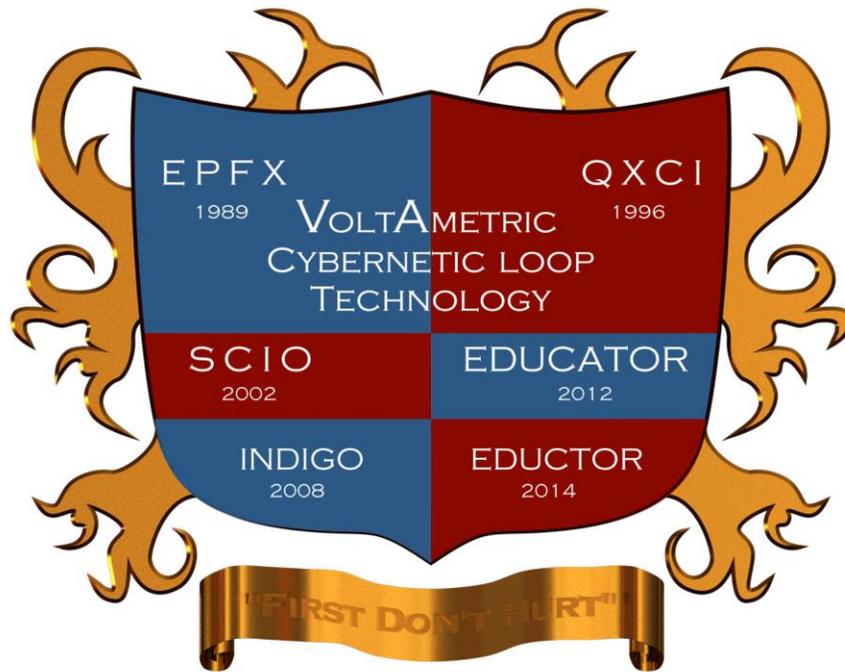

Energetic medicine has now been fully proven, validated, and verified.

Since there has been massive documentation of increases in Voltage and Amperage, and since Voltage times Amperage equals power there should be a documented physical strength measure. And there is.

Hundreds of athletes for over two decades have used the QXCI, EPM, SCIO, iNDIGO and now the maximum technology the **Eductor** with great results. Each of these systems has been designed to measure and balance the body electric factors and make the body electric stronger. The **Eductor** just does it so much better. This is not a simple matter since the body has so many safeguards to resist electrical stimulation. The body electric must safeguard from destabilizing electrical forces in the environment. The Eductor uses a complex sophisticated scientific technology to increase power.

The body resists excess stimulation and disperses the extra energy off of the skin. Only using an electrical stimulus exactly the same as the body's own electrical field potential will the body allow the charges to accumulate. The body must also harmonize to an electrical oscillation of stimulus. The **Eductor** system uses autofocusing method to find the unconscious body harmonization frequencies that maximize the transfer of electrons. Thus they used the analogy of a trickle charger of a battery. A harmonic pulse of the body resonant frequencies and chosen frequency and at a balanced similar potential the body will allow the **Eductor** to charge the body electric and thus increase the VARHOPE factors. For more complete description of the studies and science see the VARHOPE medical textbook.

This trickle charge can have maximum benefits in a simple 45 min session. The total change is limited to the body factors of free ions, free minerals, free fatty acids pools, and specifically the membrane potentials of the body. So nutrition, exercise, and good lifestyle are still very important. But there is a way to maximize your sport and scholastic performance. <http://gsrtdcs-school-intellect-sport-enhancement.com>
