

## The Crimes of Mandelay, SST, Alex Van Pelet and Ron Swinkels

I need to respond to some of the mindless drivel that Mandelay and SST have spouted recently. The key issue for our industry and for you people is the crimes that Mandelay and SST are involving you in. To protect yourself and your patients do not be involved in using criminal software from Mandelay, SST or any of their criminal distributors. How can anyone doubt who developed and owns this technology? Absolutely everyone knows that Desire' Dubounet developed and owns this technology. Just imagine the embarrassment of going to court and arguing this.

I posted this message outlining their crimes last year: **(Important parts for you in red)**

### TO WHOM IT MAY CONCERN

It has come to my attention, that the company „Mandelay Kft.“ „BHO – Budapest Home Office“ is sending out emails offering fraudulent „SCIO“ and „EDUCTOR“ – devices and accessories at reduced prices. I now find out that **Mandelay and others have been preparing illegal criminal counterfeit software behind my back, for over a year.**

**I want to make it clear, that I, the undersigned Desire' Dubounet (p.k.a. Prof. W. Nelson) because of Mandelay's recent actions and my discovery of past transgressions, am no longer working with Mandelay nor have I authorized them to sell Mandelay's new fraudulent and deceptive „SCIO“ and „EDUCTOR“ devices/software. Let the public be known that I gave them a CEASE AND DESIST of using my Name, my Intellectual Property, my Copyright and my Technology in any fashion.**

The Mandelay “SCIO” and “EDUCTOR” software is dramatically inadequate and over ten years behind my approved version made by QX WORLD. Marketing it as the same, without a name change, is deceptive and fraudulent practices (the crime of medical device misbranding). I have notified them of this and encouraged them to make a name change. They refused to. **Mandelay and SST continue with their deceptive crimes. They are guilty of Intellectual Property Infringement, Copyright Infringement, and Breach of contract, Device Misbranding, Fraudulent and False marketing claims and Counterfeit Software. Moreover, threatening me is also a crime of extortion.**

Mandelay's devices are not originals and do not have the latest approved software. **Please do not be an accomplice to this long list of Mandelay's crimes; this might involve you with criminal or civil charges.** Your patients, your therapist, your family, deserve to have right device and software.

In the spirit of full disclosure, let me be clear. Mandelay's devices are inferior, do not have my support, and fraudulently misrepresent Biofeedback. The only authorized and supported company for the production, development and marketing of the SCIO/EDUCTOR devices/software is QX World Kft. and the only engine for software activation and database of devices is [www.QXSUBSPACE.com](http://www.QXSUBSPACE.com).

Only the original devices with the latest software bought from QX World/QXSUBSPACE and registered in their database are legal, functional, safe and fulfill all legal requirements and have 2 years of warranty and technical support.

**The original letter has been released from the court and we can tell the message to show the public the truth of the Mandaley crimes.**

Here in Europe we have very strict laws on bad mouthing competition. Mandelay went to court to challenge the original letter coming from QX World. The court's first reaction was to stop badmouthing. But on deep further inspection the Hungarian courts have now decided to allow the letter. Our message describes the crimes of Mandelay. Anyone with any intellect can clearly see that Mandelay is guilty of Intellectual Property theft, misbranding, fraudulent software, breach of contract and false claims marketing.

Civil and Criminal actions are being processed, but it is a slow process. Mandelay and their partners in crime distributors clearly see their criminal action will be stopped in the future, so they are in a CASH GRAB to see how many people they can dupe into buying their fraud. **DO NOT BE FOOLED.**

Now what are the key dangers for you the buyers of criminal fraudulent technology???

First of all buying a falsely marketed misbranded system with IP Theft from Mandaley, can put you without future support and possible loss of your device and investment from government confiscation. But worst of all is using a device that just does not work. No matter what the witless Mandaley users say, just because it appears or seems to work does not mean it works. It Seems that the earth is flat, It seems that the magician is cutting the woman in half, it seems that the outdated stolen prayer wheel of Mandaley works, but these are just tricks and illusions. Stories told by a fool believed by an Idiot.

**The QX World systems are fully validated and verified with tons of scientific evidence. The Mandaley system has no verification whatsoever. Showing empty nonsensical voltage outputs means nothing. An explanation and use of the trivector and voltammetry only applies to QX World's systems. The vast scientific evidence only applies to the QX World systems not in any way connected to the criminal fraud sold by Mandaley, SST and others. Validation and Verification of claims is the law. QX World has evidence of verification Mandaley and SST does not.**

If someone asks you to validate and verify your system, only a moron will say *'it seems to work'*. There is absolutely no real evidence of the Mandaley, SST system's validity. There is no verification. **In fact there is undeniable evidence the Mandaley system matrix does not work.** If you have a Mandaley fraud rip off and get sued by anyone who asks for proof of the claims from your system, you will lose in court. Hundreds if not thousands of people will testify that it is stolen IP (Intellectual Property). And I will testify by deposition of the invalidity of their criminal fraud. Just imagine the comedy of all of Mandaley's own people and distributors in court hand on the bible trying to lie about who developed the technology. After we clearly see them in the past on videos telling the truth that I developed it. It will be just embarrassing for you. If you use Mandaley's software or systems and are sued, you will lose and pay what you are sued for. This may be an amount over 100,000 dollars just for knowingly using a counterfeit fraudulent medical device. Criminal charges might also apply. And the BAD KARMA of IP theft, just adds extra threat to the user of the fake Mandaley software. This is what awaits the Mandaley system and software users and clients.

So now if you have any questions, or do you still think that someone else developed this system?

Almost everyone in our industry knows who developed, owns and has validated the SCIO, Eductor technology. There are some greedy witless few still telling lies. Until the courts end this **DO NOT BE FOOLED.** Ask and share this and care to help us grow and get over the greedy acts of criminals.
