

[George Bush sold America to the Drug Companies.](#) And the finances depending on the clouded minds of the masses is massive in the trillions. Profit over people means it becomes possible for these secret societies to [remove dissenters, not praise them.](#) The specific causes of the killing are less important than fact that to some people Profit is more Valuable than People. We need understand that anything is possible when large income is threatened. And we need to realize that there is a way to correct this problem. If just a few hundred wrote [some insightful letters lie this,](#) we might stop the evil-ultra-rich.

We talk about the 1% Ultra-Rich and their need to control and make money. Some of these people feel that they are not part of the problem. But each and every one of these people have stock and/or asset portfolios with investment in the companies of death. Big Tobacco, Big Sugar, Big Pharma, Big Weapons, Big Oil these merchants of death make money killing people. The rich foster this with their investment. So they are participating, and many do not care. It is up to us who do care to do something. To do nothing is to be part of the problem.
