Why does Cultural Marxism redirect to here [\[edit\]](#)

Cultural Marxism is an actual school of thought, it's not a conspiracy theorist term so it should have its own article like it used to. — Preceding unsigned comment added by 82.22.30.61 (talk) 22:40, 29 October 2014 (UTC)

It is a conspiracy theory term. No such school exists, and the Frankfurt School has nothing to do with enforcing "political correctness" **RGloucester** [\[edit\]](#) 22:44, 29 October 2014 (UTC)

If you take a look at the original article to Cultural Marxism, the talk page clearly shows this is not the first time he has attempted erroneous edits in favor of his own political agenda. — Preceding

Dear TFD, Wikipedia owes you a huge collective thank you for researching the origins of the horrid "Jews & Communism" article and bringing about its well-deserved final demise. Thank you so much!! Your consistent rejection of its premises and clear recognition that it was pseudo-scholarship and your fearless first nomination of it for deletion and never wavering from your highly principled reasoning served as an intellectual and moral beacon in what at some points became an "insane world" by those defending the indefensible. May you go from strength to strength. Your sincerely, IZAK [\[talk\]](#) 11:02, 18 May 2014 (UTC)

STILL BELIEVE WIKIPEDIA CAN BE TRUSTED?

Wikipedia has a massive influence on society at this point, as it is really the only encyclopedia the majority of people use. Young people have been brought up to believe this site is somehow objective, when in actual reality any topic which is in any way controversial sides with Marxist Jews.

Case in point: the above screenshots shot a Marxist Jew manipulating information for the purpose of serving the Jew agenda.

The issue also recently came up with Gamergate and feminist articles.

The Guardian:

Wikipedia's arbitration committee, the highest user-run body on the site, has banned five editors from making corrections to articles about feminism, in an attempt to stop a long-running edit war over the entry on the "Gamergate controversy".

The editors, who were all actively attempting to prevent the article from being rewritten with a pro-Gamergate slant, were sanctioned by "arbcom" in its preliminary decision. While that may change as it is finalised, the body, known as Wikipedia's supreme court, rarely reverses its decisions.

The sanction bars the five editors from having anything to do with any articles covering Gamergate, but also from any other article about "gender or sexuality, broadly construed".

Editors who had been pushing for the Wikipedia article to be fairer to Gamergate have also been sanctioned by the committee, but one observer warns that those sanctions have only hit "throwaway" accounts.

"No sanctions at all were proposed against any of Gamergate's warriors, save for a few disposable accounts created specifically for the purpose of being sanctioned," said Mark Bernstein, a writer and Wikipedia editor.
