3.1415926535897932384.... not repeating to infinity

There are imaginary numbers like the sq root of -1

We live in a world of infinity to the power of infinity

Where we are forced to round off numbers to live, play and work

If we can first just expand our minds to accept the reality of

infinity to the power of infinity

then we can remove the limits of perception

then we can see that obstacles exist only in the mind

we can do anything it just takes time

It is often difficult to educate a child about the beauty of an open mind when he is a prisoner of societal conformity

It is often difficult to educate a scientist about the beauty of an open mind when he is a prisoner of science societal conformity

The world is full of people who have never, since childhood,

met an open doorway with an open mind

Your assumptions are your windows on the world.

Scrub them off every once in a while, or the light won't come in

Your Mind has door. Infinity is the password to open it

And as you embrace the concept of infinity your personal power will increase

And barriers will fall as your power grows

Question 1: What is the NUMBER of elements in the set of Whole Numbers?

Answer: INFINITY

Question 2: What is the NUMBER of elements in the set of Even Whole Numbers?

Answer: INFINITY

The distinct mathematical answer is INFINITY

But the 1st question should have twice the elements of the second question, or is the answer the same.

Clearly all INFINITIES are not equally in calculation representation but the end is still INFINITY

Would Infinity 1 divided by Infinity 2 equal 2?

Positive Infinity can be equal to negative infinity or unequal

Infinity is undefined

Infinity is not a real number, not a rational or even irrational number

Infinity is a concept, but instead of calling it a concept number

I will call it an AWAKENING NUMBER

Because it awakens an intelligence based on a humility in you

The smartest day of my intellectual life was when I came to be humble and recognize what I did not know rather than the false pride of arrogance

Infinity awakens in you an awareness of diversity so that you reduce bigotry

You may hate Hitler but do not need to hate all Germans

You may dislike Timothy McVeigh but you do not need to dislike all white Christians

You may hate Trump but you do not need to hate all arrogant, bigoted assholes.

Well maybe you should do that

Infinity should be the default setting in our belief on the boundary limits of the universe. The default setting of belief of extent of the universe should be infinite as well as infinitesimal. We call it 'INFINITY TO THE POWER OF INFINITY'

But this aside for now, let's discuss what we absolutely do know.

There are laws in science that apply in the area of their concern but not always elsewhere

Like the laws of chess apply on the chess board but not off of it

In fifth grade we are taught We are made of atoms, atoms have electrons in their outer shells

Electrons Repel, thus Atoms Never Touch

No one, at least no sane person in the world can intelligently debate this

NO ONE

Electrons Repel, thus Atoms Never Touch

Thus nothing really ever touches anything

You cannot touch the chair you are sitting in

The electron and proton is so small that we are so little mass

What we are is energy fields

No one has ever perceived this atomic structure true nature of the human body

NO ONE

There are over 100 Billion Neurons in the Brain

The Brain receives Photonic, Electrical, Chemical information from all of the cells of the body to Regulate all of the Body Processes

This means there is 10 to the 18th bits of information going to the brain every second,

So the word area is getting one percent of the information of life.

The Rest is going to the Body Electric.

But the Reticular Activating System (RAS Word Brain) can only handle 1 million bits of Data a second or it is overloaded

With the DNA of 100 Trillion cells sending information to all of the Brain, It is an Overwhelming task of the Body Electric.

There are approximately 10,000 cellular Operations Happening every second

We are all locked into our minds, we are stuck with dealing solely with our sensory perceptions

In some Human Bodies there are over 10 to the 27th power Electrons. an unimaginable immense number. An undebatable scientific fact

Consciousness pervades this universe with an entwined, entangled collective unconscious connectivity.

With this much fractal vast unperceived complexity and enormous immeasurability, we need to think just what are we and what do we arrive at by realizing what we truly are

With this massive number of electrically charged electrons and protons we need to first accept there is a body electric.

We must accept that we are unimaginably complex and we live in a more massive immeasurable universe.

This makes us learn to embrace diversity and tolerate differences in a vastly complex universe.

All things have a level of consciousness

You do not create the universe you live in, you perceive it, you interpret it

There are barriers and you must obey certain laws on your chess board.

There is no law of attraction, there is an effect of belief and attraction

There is a law of interpretation

You awake in this vastness with a human consciousness and you interpret your place in it

Your consciousness is the center of your universe

You can choose to be conceited and selfish in your universe

Or choose to be compassionate and share with others

There are boundaries in your world you must deal with

You do not create your world you interpret your perceptions of the world

Enlightenment is but to still the mind's chatter long enough to perceive the universe free from attachments, like greed anger, and delusions

Long enough to perceive that even the perception of self is a false belief

Long enough to see that there is no self and that we all are one and when you do for others you are doing for yourself, the cosmos contained in your consciousness

Long enough to see that the true riches of life are in honor, integrity and compassion

There will be some who will choose selfishness and become psychopaths

We must constantly guard against allowing them to hurt others

We call INFINITY an AWAKENING NUMBER

Because it awakens an intelligence based on a humility in you

The smartest day of my intellectual life was when I came to be humble and recognize what I did not know rather than the false pride of arrogance

1. By recognizing the vastness you need to be humble before a vast universe
2. Embrace diversity and let go of bias, prejudice, and bigotry
3. You need to see that you are energy and
4. See the delusion of money and find true value in ethics, honor, compassion and integrity
5. See you are entwined to others, so do NOT unto others what you do NOT want done to you
6. Clean your eyes of delusion, and you can see the infinite
