Notice from the above key word Governmental. I called the state of New York and asked about the spiritual healer license and they flat out told me that only the state can give a license. They asked for how to find the fraudsters and I did not tell them, but the hunt is on. Remember 400 cases where these people had to spend money to defend themselves. Each State has total police power in regulation of the public health. Call the State of New York and see for yourself if this spiritual healer license is legal. It is NOT. Call your State office and see if you can practice biofeedback. Biofeedback and Wellness is not regulated in any State. But practicing medicine is.

The practice of medicine is diagnosing a disease and treating it. If you are doing Wellness or Biofeedback training for stress reduction and or life style improvement of Wellness you are not practicing medicine.

The State has the police power in regulation of the public health. Physicians in the U.S. are regulated by state licensing. Legislatures have the power to require a license or certificate to practice medicine within the state and to make practicing medicine without a license a criminal offense. However, regulations made to control the practice of physicians should be constitutional and reasonable. Such regulations should be to protect the public from mistreatment by incompetent physicians. State legislatures have delegated the authority to supervise licensing, exam, and suspension and revocation procedures involving a medical practitioner to a state board of medical examiners. States also have the power to oversee advertising made by physicians to verify if the advertisement is fraudulent, misleading, or deceptive.

When a physician is provided with a license to practice medicine, the physician will have authority to treat any ill person by any legitimate method of treatment. When a person is practicing medicine without a license the physician is committing a criminal offense. Civil remedies under a suit for injunction can also be sought when an unlicensed physician violates the statute by practicing medicine illegally. When a physician is unskilled and incompetent, the unlicensed practice can amount to a nuisance. When a physician is practicing without a license the act constitutes a misdemeanor in some states a felony.

In America only a governmental office can grant a license. Medicine is controlled by the States and not the federal government. I think the Spiritual Healers Licensing Board might get into trouble using the word license in America. Under British Law it is a bit different.

Second British Law: "A license is simply an authority or permission to do what is otherwise wrongful or illegal and in ordinary usage it extends to the document certifying or recording that the appropriate permission has been given by the competent authority." (the best competent authority is the educational credentialing body)

From Anne: I, for one, am so glad to see this issue addressed. I attended the very first class given by Dave to enable practitioners to become "licensed".

The whole thing just smelled like a money-grabbing scam playing on the fear of being attacked for "practicing medicine without a license (meaning a legitimate license). Of course to make more money, this license was to be renewed annually. When the first renewal period approached I sent a certified letter to John Gilbert's FSHLB asking direct questions about the validity of their license. To this date, I have never received the courtesy of a reply. (Why was I NOT surprised?) I might agree with Dave in that their license may not be illegal, but the rest of the story is that their license is totally WORTHLESS. It certainly is not worth the annual renewal fee, the cost of the week-long course, transportation, room and meals. Actually FRAUD has no statute of limitation.

From Dave Cowan Dec 9, 2012

The Spiritual Health Coach License as issued by the FSHLB.com is NOT illegal or criminal, or it would have been shut down years ago! Please ignore information from outside the country that denies the facts. Over 400 court cases lodged against legitimate Spiritual License holders have been tossed out as the US court system still respects the difference between state regulated practices (MD. Massage, etc.) and Spiritual Healing which is unregulated by any state. I thought we were all in the healing profession together???

Comments from Liama':

Oh My God. He admits there have been 400 people in court under charges. He does not tell us the charges are dropped when the therapists agree to never see another patient!!!!!!!!!!!!!!

From Peter:

The legal definition of "license" : "Permission to perform an act which otherwise would be illegal, when granted by competent authority." (i.e. usually government)

IMO the whole concept of FSHLB granting a Spiritual Healer "license" is pure nonsense. Best they could do is grant some form of accreditation based on a set

standard of some sort. Dr. Gilbert wrote: "The Federation of Spiritual Healer License Boards is owned and operated as a nonprofit spiritual organization by fifteen different tax exempt churches of different denominations. Each church sponsors a tax exempt spiritual healer license board that issues spiritual healer licenses for spiritual healers, coaches or practitioners."

So what does this mean? Are these 15 different "tax exempt churches" 501(c)3 IRS or Canadian equivalent approved corporations? So we purportedly have 15 different church sponsored

"license boards" from different "denominations" and I assume these 15 are located in different localities and/or states. Is there any uniform "licensing" standard among them since these

15 "denominations" may have differing standards to what is "spiritual"? What legal form of "non-profit spiritual organization" is FSHLB? Is it an Association, corporation, or other recognized legal entity, and if so, where situated?

A full investigation has found this series of licenses to be an illegal scam to make money and propagate fraudulent health care devices like the Quantum Home Trainer.

Why is Quantum Home Trainer Fraud?
