

# Important Announcement

## Please Read This

I am so tired of having to deal with criminals, frauds, and deceit from TQA + QWV and others. But this message is important for all of you to read. This message affects you all.

### Why the 2013 is mandatory

The 12-12-12 was mandatory for several reasons, most importantly to get the Old Indigo to work. The keys to regulatory compliance of a medical device are safety, traceability, and validation of claims. I had hoped that the 12-12-12 would remain usable and not be subject to Expiry. The Expiry Date need only be used to protect compliance and allow us to continue marketing by ensuring safety, traceability and validation. But continued inept ill-informed desperation of TQA QWV has led to another problem.

The trademark does not imply ownership. Mandalay has a trademark for the SCIO and the Eductor of course, but the real issue of ownership is ownership of the safety, validation of claims and most important for medical registration is traceability. TQA QWV are out of the loop and confused. The proof of this is the simple undeniable fact they have totally removed themselves from contact with the sole authority on the issues, Desire' Dubounet and BHO. Their inability to contact with the head office, owner operators, developer, software designer, registration lawyer, medical consultant, official bio-engineer, and head validation officer has put them into a position of lying deceiving. TQA QWV have sold illegal software not in the legal database with a hacker distortion, So we are forced to make the new improved protected 2013 version mandated.

Sometime ago one of the world regulators asked me a key question during one of our basic compliance inspections. The question was "are the people you sell to ethical and honorable enough to obey a mandated recall". Since over 90% of the QWV indigo people have yet to get compliant software the ~~answer is apparent.~~ The regulation inspectors also asked are there many hackers making counterfeit illegal versions of your software. I said that Francisco, Szabo Gabor, Grand Master Baiter, Gernot Gauper, Kunde and many others have made counterfeit illegal dysfunctional bogus copies of our validated class 2 medical software. Police authorities are onto all of them. The incredible success of our system makes us a target for counterfeiters. The temptation to steal money from people is too great for these criminals to resist. To answer this question we had to tell the truth that most of our people do not respect recall mandates, and there is a strong chance that people will be fooled into buying false or untraceable software not in our database. They say "Imitation is Flattery" but here it is criminal.

The regulators then said then you must use an "Expiry Date" to protect the public. This is a must for us to protect people and encourage them to get traceable working software. The regulator is there to

protect the people. We need to have traceable, validated, verified software proven safe and effective. It must be traceable and thus in our database. We are obliged by law to protect the public from untraceable dysfunctional counterfeits and a way to mandate compliance with an "Expiry Date".

---

If there is no need to activate such an Expiry procedure we circulate a release file that negates the Expiry Date. This file will neutralize the Expiry Date. We only use this when we have to, to protect you the user and the public. But now we have heard of a criminal attempt to illegally circumvent or legal traceable software database from TQA QWV. Traceability is important and all software users must be registered in our database. Just like all parts including the harness must have serial and or batch numbers for traceability. Gage is selling illegal SCIOs and software not in our database. We must protect the users.

So we must activate the 12-12-12 "Expiry Date". Some illegal hackers have found a criminal dishonest way to take the credit limit up on the 12-12-12. We have had to spend time and energy making new more protected software with many new improvements. The 12-12-12 will expire in the next two months or so. I know this is a hassle for you but we must defeat the criminals from stealing the software and putting our industry at risk. Traceability is the law.

The new 2013 version will NOW be mandatory for all to secure that the hackers cannot put the public or our industry at risk. The new -2013 version will now cost 300 euros. The new and improved BIG will go to 200 euros. We will take into consideration what you have paid in the last year.

The good news is those of you who were honorable and respectful of the law and got the 12-12-12 or better, will now be able to get the new 2013 version for a reduced rate. You were honorable and you should not be penalized for the crimes of greedy hackers.

A trademark is for name control only and does not confirm ownership. The 12-12-12 in question has the name Eductor as the software name. Desire' coined the name SCIO and registered it with the FDA in 1987. As we see in the appendix BHO Mandalay has the trademark on SCIO and Eductor. But the key issue of software ownership does not lay with the trademark. Ownership of the source code and regulatory validation of the software is the key of ownership. As any court will be happy to confirm by view of history and law, Desire' developed it. And true proprietorship, ownership and control are clearly with BHO, QX ltd and Mandalay not the hackers. Be sure that only BHO can help provide you the truth.

If you have the legal software then a minimum amount is paid on PayPal to stop hackers from cracking activations codes, and what you have paid in the last year will be considered in credit to you. We are here to help you and we are all struggling to get through this time of stress and tension.

If you have questions of if you are in the legal database or not or what it will take for you to get the new 2013, please ask Geri at [www.qxsubspace.com](http://www.qxsubspace.com).

We hope we have put this last hacker crime spree behind us, and with your help we will. We are sorry for the stress and inconvenience the hackers have cost you.

**If you want to read more evidence against QWV please read these**

Many people have started police actions against Gage, Ken, and Brian. If you wish to see the police reports against them please read the following.

<http://medicalexposeddownloads.com/PDF/the%20Police%20are%20after%20the%20TOA-QWV--%20This%20fiasco%20must%20end.pdf>

So many people have been hurt by the libel and lies of QWV and some bigoted people a class action lawsuit has been started. Please read this to see if you want to join in.

[http://medicalexposeddownloads.com/PDF/Class\\_Action\\_Law\\_suit\\_against\\_TOA\\_QWV\\_and\\_their\\_Libelo-us%20Supporters.pdf](http://medicalexposeddownloads.com/PDF/Class_Action_Law_suit_against_TOA_QWV_and_their_Libelo-us%20Supporters.pdf)

If you wish to see my latest and hopefully THE LAST discussion with Gage and her lies please read this.

The screenshot shows the CTM-ONLINE search interface. The search criteria are: Trade mark No: (empty), Trade mark basis: All trade marks, Trade mark name: Contains eductor, Trade mark type: All, and Vienna codes: (empty). The search results list includes:

Trade mark No	Filing date	Type of mark	Date of registration
011043290	16/07/2012	Word	06/12/2012
Nice Classification	5, 44	Status	Registered
Name of the owner	Mandaly Inc. INTL	Publication of registration	
Applicant's reference	MMO2012		
Trade mark basis	CTM		

If you go to the Europe online trademark site type in Eductor and you will see that in 7- 2012 Mandaly secured the trademark for Eductor we allow Scio International to use the Eductor name as Eductor Scio as long as they work within our contract to use only BHO paypal activated software

If you can all understand that only BHO can tell you the truth and help you get the right legal and functioning software we could end this war of words and make our industry safe.
